Evening Brief

Date: Sunday August 13, 2017

Weather Summary

A cold front associated with a low pressure system across the Pacific NW will move into western ID and northern NV on Monday for slightly cooler temperatures and an increase in westerly winds. A band of clouds and showers with isolated thunderstorms along and ahead of the front over southern ID into northern NV this morning will increase and move east into mainly the eastern half of the Great Basin by Tuesday morning as the front moves east and south.

Breezy SW winds ahead of the front with low RH will occur over southern and eastern Nevada into Utah on Monday, however fuels in these areas have been moderated by moisture recently.

Thunderstorms on Tuesday will mainly remain on the eastern side of the Great Basin with just a few storms possible along the Sierra Front. Thunderstorms will again develop further west over central/eastern Nevada into Utah on Wednesday as the cold front stalls and moisture remains in place. Drier air will mostly remain in place across Idaho from Tuesday through the weekend.

Temperatures will briefly cool to near to just below normal early in the week, then increase to just above normal again later in the week through the weekend.

Preparedness Levels

Great Basin	3
National	5

Great Basin Fire Activity (from Irwin): Moderate Activity

New Fires and Acres: 27 fires for 1,693.85 acres; 973 acres large fire growth; 1 new large fires

Resources:

- Crews: 10 T1 IHCs in GB: 9 committed, 1 R&R.
- GBCC has committed an estimated 64+ Type 3, 4, 6 engines.
- 0-T1 and 7-T2 helicopters are available in GACC.

Great Basin Fire Potential Summary

Very high fire danger indices for the time of year are being observed over the mountains of western and central Idaho. Values are much lower across the south and east. Fire danger indices are expected to decrease somewhat in all areas through early this week as a cold front sweeps from north to south across the area, with wetting rains across much of Idaho into Wn WY and northern portions of NV and UT. However, drier and warmer weather will return by mid to late week.

The western portion of the Great Basin will get a break from the monsoon much of this week, allowing fine fuels to dry, especially over NV.

Great Basin
Coordination Center

We have issued a Great Basin **Fuels and Fire Behavior Advisory for Nevada, Idaho and Utah**, available at the following link:

https://www.predictiveservices.nifc.gov/fuels_fire-danger/GB_Fuels_and_Fire_Behavior_Advisory.pdf

Current Incident Details
